Opportunity to earn a Master in Applied Epidemiology degree after successful training completion

Who can join the India EIS programme?

MD
Community
Medicine
or
equivalent

MD
Clinical
or
Para-Clinical

**MBBS
and
Diploma**
with
3 years' experience

MBBS
with
5 years' experience

AGE limit
Not exceeding
45 years

- Government sponsored candidates require nomination from organization
- Self-sponsored candidates can apply directly

Why sponsor an officer from your State?

Prevent: Officers learn systematic programme evaluation to identify implementation challenges and the root cause for public health issues

Detect: Officers return with stronger surveillance and data analysis skills for early outbreak detection

Respond: Build a workforce trained to handle public health emergencies

EIS officer contribute to change

- Design and implement epidemiological studies to address public health problems and inform policy decisions
- Respond to outbreaks in real time and contribute to public health actions
- Evaluate and improve disease surveillance systems
- Effective public health communication with policy makers and community leaders
- Opportunity to co-author scientific manuscripts leading to public health impact

Since 2012, **60** EIS officers have been trained who have investigated more than **173** outbreaks in **27** states, led **60** surveillance evaluations and published **59** manuscripts
